## Investment Advice

We do not currently provide investment advice as part of the services we provide to clients. We provide execution services based on taking orders from our clients or responding to requests for quotes. We do not make personal recommendations to clients regarding transactions in financial instruments that we present as suitable or based on a consideration of that client's circumstances. We may provide general information about our products and services or about the market.

In the event that we determine we will provide investment advice, this information page will be updated as appropriate.
